

GRACO CORPORATION

ADJUSTABLE PAD PLATE THE ULTIMATE PAD PLATE

The same style adjustable pad plate as used on our GraCoil system. Two eccentric cams provide a nearly unlimited range of adjustments for height, center and rotation. Locks securely to hold your settings. Fifteen mounting holes let you position the recoil pad exactly right, so you get the best possible gun fit.

MODEL 580
PAD NOT INCLUDED

The plate will add $\frac{3}{8}$ inch to the stock length and comes complete with screws and hex wrenches.

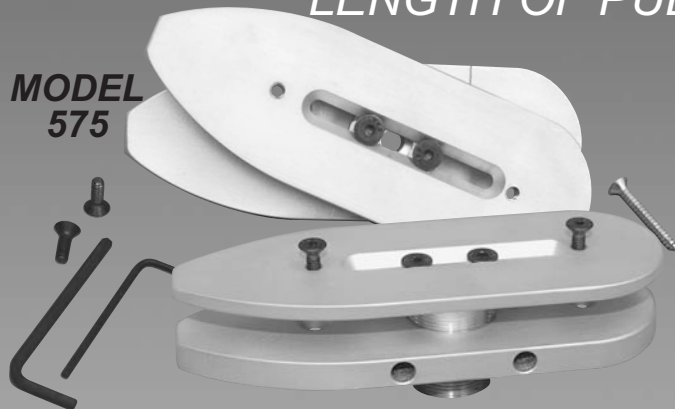

MODEL 585PA

The 585PA is a single point pad adjuster that can provide quick, simple adjustments through the recoil pad. This does require cutting an access hole in the recoil pad at the time of installation. The 585PA provides a full range of pad adjustment and comes with a non-slip material for a secure lock-up.

**Recoil pad and installation is not included.*

ADJUSTABLE BUTT PLATE "LENGTH OF PULL" ADJUSTMENT

MODEL 575

At GRACO our policy is to make quality a priority and satisfaction our guarantee. We believe our customers deserve the best, and we strive for nothing less.

The "length of pull" adjusts in or out $1\frac{1}{8}$ inches. The pad plate moves up or down $1\frac{1}{2}$ inches and can rotate to any comfortable position "toe in" or "toe out". A positive locking system holds the adjustments in place without slipping. When unit is closed, it adds $\frac{5}{16}$ inches to the stock length. Available in two models.

MODEL 575S - Standard Butt Plate

The Standard Butt Plate unit is for pump action and break open shotguns, and is designed to hold a BreakKO recoil reduction unit.

MODEL 575A - Auto Butt Plate

The Auto Butt Plate is for semi-automatic shotguns with a long action spring tube. Fits Remington 1100, 11-87 & Beretta 303
